"Specialists in Technical Textile Components"

SPECIALIST CONVERTERS

Felt, Foam, Cork, Rubber, Adhesive Tapes, Non-Wovens and most flexible materials.

• Washers • Gaskets • Seals • Strips • Pads • Sheets • Discs • Coils • Adhesive Backing •

With an extensive range of the latest and most advanced CNC die-cutting presses, we can produce bespoke products to customer requirements, such as washers, strips, gaskets, discs etc. In addition, the software that we possess enables us to digitise irregular shapes providing excellent material utilisation. This factor combined with the machines ability to cut accurately at high speed enables us to ensure competitive pricing.

We are also pleased to offer our cutting and conversion facilities for free issue cutting of your material.

Adhesive Backed, "Kiss Cut" Parts

This computer-controlled machine provides us with the ability to offer a wide range of accurately cut adhesive backed parts. Many people will have encountered difficulties peeling the adhesive backing from their components.

However adhesive backed components that are kiss-cut are very user friendly. We produce a high number of "sticky dot" type products for a wide range of applications in everyday life. Components cut in this format have also helped to increase productivity in many of our customers production lines due to less time being wasted removing the backing.

Numerous other services are available including,

- **Laminating**
- **Adhesive Backing**
- **Sewing**
- **Heat Sealing**
- **Stapling**

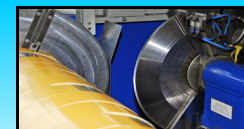

Please contact us with your requirements!

Cutting Table

This highly versatile machine enables us to produce intricate components without the need for tooling. We are able to receive drawings electronically, and by importing them into the machine produce accurate parts to customers specifications, quickly and efficiently. This capability also ensures maximum material usage, reducing waste and therefore cost.

This technology enables us to work with many customers in R&D, providing fast and cost effective prototype samples, ensuring a perfect fit solution prior to purchasing production tooling.

Coil Cutting (Plain and Adhesive Backed)

The recent addition of a CNC Slitting or Coil cutting machine enables us to offer our customers coils and strips both plain and adhesive backed to very tight tolerances. We are able to cut almost any flexible roll material such as felt, foam, rubber, cork, adhesive tape and even high-density para-aramide, (Kevlar® etc).
