

# ELITE - 100% Wool Felt

## Technical Information

Fibre: 100% Wool

Thickness: 5mm

Density: 0.30g/cm<sup>3</sup>

Roll Size: 1450mm x 10M (approx.)

100% wool is regarded as a safe fibre in its flammability. It is self-extinguishing & inherently flame retardant.

The natural flame resistant properties of the wool fibre are connected with its relatively high nitrogen & moisture content. When considering flammability it must be remembered that virtually all materials are flammable in certain atmospheres & conditions.

## Flame Proofing

Flame Proofed ELITE is available upon request & subject to minimum batch quantities. This treated material will provide a felt that is tested to BS476: Part 7: 1997 Class 1Y

## Cleaning Instructions

If soiling should occur, gently spot clean the area with warm soapy water being careful not to saturate the felt with moisture.

## Dye

Natural fibres have minor variations in structure which can affect how much dye is absorbed, therefore colours are subject to variation between each production batch. The material is dyed using environmentally friendly products

Please contact Sales for additional information

## Colours

Available in a range of 15 colours.

(Non-standard colours available for full manufacture, including Pantone Shades, subject to full batch quantity of approx. 45LM per colour)

## Bespoke Converting Services

We are able to offer several in-house cutting methods and as the material is a non-woven textile the edges are left clean & neat with no finishing required. Each project is considered individually to establish the most suitable cutting method based on required design, size & quantity. We are also able to offer lamination to provide the material with a self-adhesive backing.

ELITE felt is a high quality & versatile material available for a variety of applications;

High-end Toys & Games  
Tableware  
Decorations & Gifts  
Shop Window & Wall Displays  
Art & Gallery Displays  
Interior Design  
Fashion & Accessories  
Furniture  
Rugs
